# METHODOLOGY

## "OUR PLAY"

01

### MEET THE PLAYER

The approach to the player is not only getting to know him from a sporting perspective, for us the social aspect and his environment are key.

02

### WE GENERATE UNCERTAINTY

Sessions created to generate uncertainty, key to the process to adapt to the variability of the game, in which it gives strength for new challenges and increases motivation

03

### SYSTEM OF RELATIONSHIPS

One of our ways of expressing talent is to relate the parts to reach the whole, and the whole to reach the parts, so we extract deficiencies from each action to achieve new horizons through the behaviors of close colleagues in relation to the ball.

04

### OPTIMIZE THE GAME

- Simulation tasks closest to the competition promoting: "Our PLAY"

05

### COMPETITION

All tasks designed and linked with the ball, to increase environmental information and perceive in relation to teammates, and thus understand each other in the game.

# FOR YOU!

## TRAINING SESSIONS

High-level training in which we tactically and mentally promote the player's **UNDERSTANDING** through the emotion and sensation cycle.

## KNOW THE PLAYER AS A WHOLE, AND ITS PARTS.

We will have synergistic sessions once a week, paying attention to detail, in which we will relate the players by close and better related positions, to follow our method: "OUR PLAY".

## SPORTS MEDICAL INSURANCE.

Once the player is registered in our database with the football federation, he will be covered by **SPORTS** medical insurance, in the event of an injury after training and league games.

## "WE HELP THOSE WHO HELP"

Thanks to our collaboration agreements with clubs that are increasingly closer to the professional, both in Spain and in various countries, we will be able to advise, guide and lead the player to obtain professional contracts.
